

I am writing to respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming I have grown to enjoy and appreciate. From Music to news, old time radio, and now Traffic and weather. As a constant traveler, I am sent to work in many areas of this country, and XM has allowed me to have a series of stations to listen to, and provides a variety of programming that saves me time and distraction, by not having to find a "local stations" that will fade in time as I move on. "Regular station do not provide the "continuous traffic and weather" that XM Radio does, and in such an easily located format...you try visiting a new city and finding the "local report" that fits your needs in a timel manner. Isupport XM's right to provide their listeners with good quality radio. Defeat HR-4026.Ken Sneyd
